YOUNG PEOPLE GET CONNECTED VIRTUALLY

In Ecuador various virtual activities were carried out - reaching up to 500 people from SOS CV Ecuador, Colombia and Honduras

500...

Through different online workshops, carried out by **DHL Volunteers** more than 500 young people could be reached. The Focus of the Workshops was on topics like Digital Learning, Entrepreneurship, Cybersecurity and Personal Finance.

Virtual Engagement WHY?

The COVID - 19 pandemic has affected our school systems and especially in these difficult times it is important not to leave anyone behind. Encouraging e-learning and helping young people to master technology is the only way to ensure that they can keep up with rapid developments. In order to enable them to seize opportunities and actively participate in shaping the future.

YOUNG PEOPLE GET CONNECTED VIRTUALLY

#keeponlearining

#keeponlearingn was a series of **3 Virtual Workshops** carried out by 15 DHL Volunteers. Each of the Workshops consisted out of 17 sessions with the aim to promote online learning. The topics of the workshops were:

1. CANVAS Business Model

This workshop was launched with the goal to foster entrepreneurial skills. The content was focused on how to design and present a business idea in an agile, coherent and striking way.

2. Personal Finances

Offering interactive resources such as financial advice infographics and worksheets, the intention of the workshop was to encourage a culture of saving in young people. Teaching them ways to analyze their expenses in order to reduce them and start saving.

3. DQ World

In the course of the third workshop the online learning platform DQ World was promoted. DQ World a platform with fun and educational lessons on Topics like; Digital Citizenship, Cyber-Bullying, Cyber-Security, Digital Empathy, Screen Time Management, Critical thinking and Privacy Management.

Programming - But FUN

SCRATCH is a online platform that offers FREE programming lessons to kids. Essential programming skills can be learned in a playful way by creating stories, games and animations. Scratch helps young people to think creatively, act systematically and work together

GoTeach organized a programming workshop/competition with the Title **"Programming Video Games to Design the Future. "** 58 young girls and boys supported by SOS CV Quito participated in the contest. The first price was a LAPTOP and the second price was a TABLET. The course was conducted over the e-learning platform "E-CLICK" of SOS CV Ecuador.

"I am participating in this contest/course, to have fun and learn but also because I want to win the computer that would be very useful for me when I go to University".

-Sara Soranga, 16 years - Cuenca Ecuador

Why GoTeach?

"This program allows to generate a great and true impact to the vulnerable society in alliance with Aldeas SOS we generate commitment in our collaborators since they are the volunteers that execute the actions. We invite everyone to join in and together make a difference. Generate Health, Education and Employability (self-sufficiency) this is the way. to go"

– Marco Vinicio Vásquez, Program coordinator
